

Develop A Web Application Using Node-RED

Steps Followed:

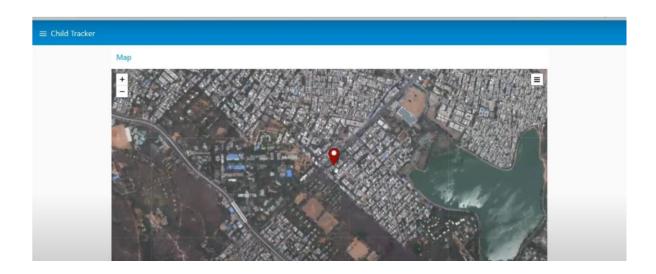

- Opened a Node-RED project
- Added code to get child location in python

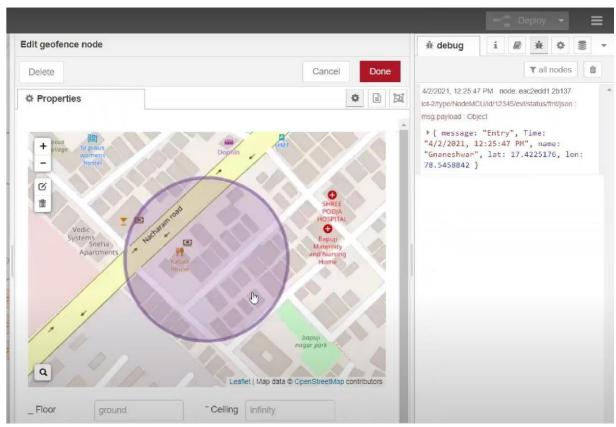

```
import json
import wiotp.sdk.device
import time
myConfig = {
    "identity": {
    "orgId": "hj5fmy",
    "typeId": "NodeMCU",
    "deviceId": "12345"
    "auth": {
         "token": "12345678"
client = wiotp.sdk.device.DeviceClient(config=myConfig, logHandlers=None)
client.connect()
Thile True:
         name= "Smartbridge"
         #in area location
         latitude= 17.4225176
         longitude= 78.5458842
         #out area location
         #latitude= 17.4219272
         #longitude= 78.5488783
myData={'name': name, 'lat':latitude, 'lon':longitude}
         client.publishEvent(eventId="status", msgFormat="json", data=myData, qos=0, onPublish=None)
         print("Data published to IBM IoT platfrom: ",myData)
         time.sleep(5)
client.disconnect()
```

• Located the child

Created the geofence node

• Python script sending requests to IBM Cloud After running the script, the web

```
⊕ × IPython console
{\tt Editor - C:\Users\HP\Desktop\child.py}
child.py
                                                                                                           Console 2/A 🖾
                                                                                                            Data published to IBM IoT platfrom:
